

NEW AGATEC MULTICROSS LASERS

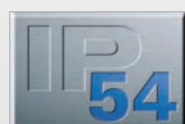

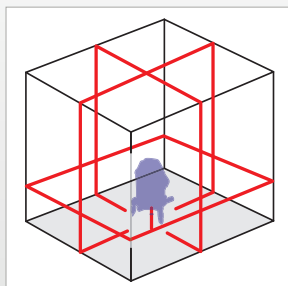

A f f o r d a b l e . R e l i a b l e . S m a r t .

With the Agatec multicross laser MC8, your leveling job is accomplished in few seconds, with 360° lines coverage, both horizontal and vertical. Electronic levelling allows the highest precision, more stable than any pendular level, especially when operating on construction site, surrounded by vibrations. **It measures all around you in every direction. Ideal for those who search the best in class in the multicross laser offering, with a very robust housing and complete functionality.**

- **Highest precision with the electronic leveling: ± 1 mm at 10 m**
- **Total room coverage 360°: full crossline projection**
- **Easy squaring function with cross line on ceiling plus plumb down**

It is ideal for installing tiles, kitchen cabinets or metal studs for dry walls

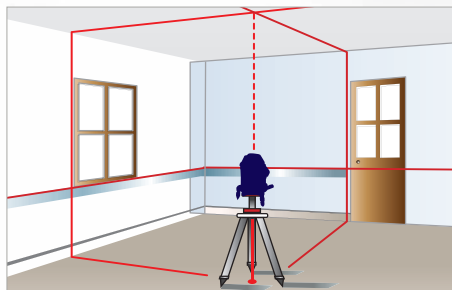

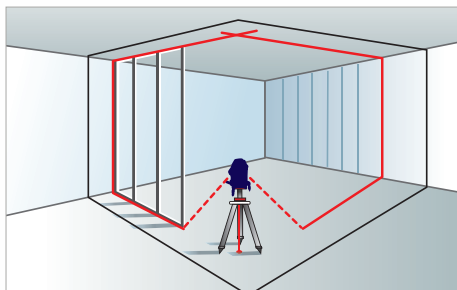

SPECIFICATIONS

Art. No. 784259

Horizontal lines	4
Vertical lines	4
Automatic leveling	Electronic
Fine adjustment with precision screws	✓
Adaptable feet	✓
Individual lines activation	✓
Horizontal rotating mechanism	✓
Plumb down	✓

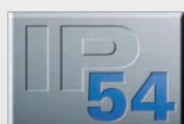

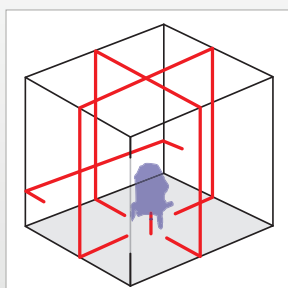

This robust multi cross laser projects 4 vertical and 1 horizontal lines, with high intense red laser beams. Agatec MC5 increase your job efficiency in leveling, squaring, layout and alignment applications. It works outdoor with a laser receiver (optional). **Ideal for professionals that need an instant self-leveling laser, with high working range and visibility.**

- **Accurate line projections in few seconds**
- **Extreme high visibility, in any indoor condition**
- **Robust housing, IP54 protected against water and dust**

Agatec MC5 supports you with drywalls, tiles, flooring and general alignment tasks. Applications are easier with laser cross to the ceiling and plumb down

Very precise alignments with the fine adjusting screws
